May 2022

We are reaching the end of our CIDizen project, already 2 years from its start!

In the last months of the project, all the main learning resources have been developed and the partners have multiplied their efforts to actively involve young people and youth trainers in the CIDizen training activities. We are proud of the great results that we achieved thanks to the engagement of everyone!

EVENTS AND TRAINING ACTIVITIES

Pilot tests with young people. In the last months of the project the 40 Digital Breakouts to develop young people's cultural intelligence have been tested by a wide number of young learners in Cyprus, France, Ireland and Denmark.

Pilot tests with youth workers. The In-service training programme for youth workers has also been tested in the partners' countries. Thanks to these activities, the youth educators learnt how to develop their own Digital Breakouts and how to adapt them to their training activities.

CIDiZen MOOC. The MOOC was used as an online learning platform. Young people and educators registered, answered the quizzes of the Digital Breakouts and went through the Trainers' Programme. It is now available in

Final meeting and conference in Aarhus

On May 19th, the project partners finally met in Aarhus for the first and the last time during the project lifecycle! They discussed the last topics and the drafting of the final report.

The day after, the final conference of the project took place. This was the occasion to present the Digital Breakouts to more young learners and to show the final video telling the story of CIDizen.
